

EXCEPTIONAL SOLUTIONS. SIMPLY DELIVERED.™

A partner that brings dependability, stability
and simplicity to healthcare providers
and patients worldwide.

THE NIHON KOHDEN DIFFERENCE

Born in healthcare. Devoted to healthcare.

Since our inception, Nihon Kohden has dedicated itself exclusively to advancing patient monitoring, neurology and critical care, driven by our desire to help patients around the world. Our tireless work, as well as our experiences on the front lines of healthcare, have given us deep insights into the challenges faced by the healthcare industry—challenges we are committed to helping you meet.

Simply.
Elegantly.
Exceptionally.

At Nihon Kohden, we believe:

Quality comes first— in everything

Our products and services are renowned for their unmatched reliability¹

Premium-as- standard is a guiding philosophy

All functionality is enabled and ready to use—without paying extra for features

Patient care is paramount

Every product is designed to allow clinicians to spend more time with their patients and less with technology

We are on the journey with you— day and night

Our clinical and service teams are only a phone call away

Our commitment to you doesn't come with an expiration date

Software upgrades and updates free for the life of our products

Nihon Kohden is the only and longest patient monitoring and neurology company continuously dedicated to healthcare since its inception².

Premium-as-Standard

Nihon Kohden's premium-as-standard philosophy is the belief that every piece of equipment should be designed with all features—both standard and premium—unlocked and ready to use at a moment's notice. This ensures that the technology can be employed in the broadest range of acuity levels and allows clinicians to stabilize patients in place, which may reduce the need for transfer between departments—and ultimately the potential risk of serious infection³.

SEEING POSSIBILITY WHERE OTHERS DON'T

Created for clinicians, by clinicians.

Each Nihon Kohden advancement is designed with one purpose in mind: To solve a problem healthcare providers face in delivering exemplary care to their patients. It was the impetus behind the company's founding and the inspiration for Nihon Kohden's industry-leading innovations that have changed how healthcare is administered around the world.

"The Man Who Invented One of the Most Important Technologies for Patient Safety"

Deemed "the most important lifesaving practice during surgery" by the World Health Organization, pulse oximetry was the brainchild of Nihon Kohden researcher Takuo Aoyagi, Ph.D. Based on his research, the company introduced the world's first ear oximeter that measured saturated blood oxygen without the need to draw blood. While pulse oximetry revolutionized patient care, the company decided it was too valuable to keep to itself and shared the intellectual property with the world. Today, all pulse oximeters are based on Dr. Aoyagi's breakthrough.

Takuo Aoyagi, Ph.D

Nihon Kohden Innovations

Pulse oximetry

Inflation-based
non-invasive blood
pressure (iNIBP)

Digital EEG
systems

Ventilator with
Protective Control™
for patients in isolation

Wireless EEG
systems

Ambulatory
vital signs telemetry

Patient monitor with
arrhythmia detection

Fetal monitor that
uses telemetry

Mainstream CO₂
monitor for
non-intubated patients

SIMPLICITY WHEN YOU NEED IT

Healthcare is perpetually evolving.

Every day, healthcare providers are being asked to do more—deliver better care, quantify improvements, manage patients with multiple comorbidities—all with fewer and fewer resources.

When change is your day-to-day experience, it is critical to have a partner who can bring dependability, stability and simplicity to your work. Nihon Kohden is dedicated to removing obstacles from your work, making everything from working with a patient to implementing an entirely new patient monitoring, neurology or critical care system as effortless as possible.

In Partnership With You

Nihon Kohden works with hospitals and health systems to simplify their workflow, training and administrative needs. The benefits Nihon Kohden customers experience include:

- Clinical assessments conducted by nurse executives to help maximize workflow
- Subscription-based pricing models to fit any financial need
- Performance CareSM comprehensive service and support program
- Four-part training program for seamless transfer of new technology
- Lifetime biomed training
- Technical support for the life of our products
- Access to continuing education courses through Nihon Kohden University

Nihon Kohden's One-Admit/One-Discharge functionality allows for a continuous, uninterrupted medical record across a hospital, so healthcare providers can spend more time with patients and less time with technology.

Nihon Kohden understands your needs because its team members have worked on the frontlines of healthcare for decades.
